

# ANSH GAUR

## Aspiring SAP S/4HANA / ABAP Cloud Developer

India | +91-9149162265 | anshgaurx@example.com | linkedin.com/in/ansh-gaur-46b7a4378 | github.com/anshgxgaur

### PROFESSIONAL SUMMARY

Computer Science student building a career as an SAP S/4HANA / ABAP Cloud Developer, with focus on modern ABAP, CDS data modeling, RAP, OData, Fiori Elements, SAP BTP and Clean Core principles. Backed by hands-on data engineering experience in Python, SQL, REST APIs, PostgreSQL and Docker, including an entity-resolution and semantic search system. Seeking an entry-level SAP development or internship role.

### TECHNICAL SKILLS

**SAP Development:** ABAP, ABAP Cloud, ABAP SQL, Object-Oriented ABAP, Core Data Services (CDS), RESTful ABAP Programming Model (RAP), Entity Manipulation Language (EML), OData, Fiori Elements, SAP BTP, SAP S/4HANA, Clean Core  
**Programming:** Python, SQL, REST APIs  
**Databases & Data:** PostgreSQL, MySQL, MongoDB, Data Modeling, ETL / Data Pipelines, Data Integration, Vector Search / Embeddings  
**Tools:** SAP Business Application Studio, Eclipse ADT, Git, GitHub, Docker, VS Code

### PROJECTS

#### SAP Sales & Order Management Application 2026 – Present

ABAP Cloud, CDS, RAP, OData, Fiori Elements | [github.com/anshgxgaur/sap-sales-order-management](https://github.com/anshgxgaur/sap-sales-order-management)

- Designing an end-to-end sales order application in ABAP Cloud covering 3 core business entities: customers, products and sales orders.
- Modeled data with CDS views and implemented a RAP managed business object with behavior definitions for create, update and delete (CRUD).
- Implementing validations and determinations, using EML for programmatic access, and publishing OData V4 services.
- Building a Fiori Elements List Report and Object Page UI and writing ABAP Unit tests targeting 85%+ coverage of custom behavior implementations, following SAP Clean Core guidelines.

#### SAP Inventory Management Application 2026 – Present

ABAP Cloud, CDS, RAP, OData, Fiori Elements | [github.com/anshgxgaur/sap-inventory-management](https://github.com/anshgxgaur/sap-inventory-management)

- Developing an inventory application in ABAP Cloud to track products, stock levels and warehouses.
- Designed CDS views for inventory data and RAP business objects with stock validation rules and custom inventory actions.
- Exposing services via OData with a Fiori Elements interface; documenting architecture, data model and business logic.

#### SAP Enterprise Data Integration Pipeline 2026 – Present

SAP BTP, ABAP, REST APIs, Python, SQL | [github.com/anshgxgaur/sap-data-integration](https://github.com/anshgxgaur/sap-data-integration)

- Prototyping a data pipeline that exchanges structured business data between an enterprise application and an external processing system via REST APIs.
- Developing Python transformation components and SQL validation logic across separate source, transformation and destination layers.
- Documenting data flow, error handling and integration architecture; evaluating SAP BTP services for integration.

### EDUCATION

#### Bachelor of Technology (B.Tech), Computer Science – Data Science 2024 – 2028 (Expected)

Pranveer Singh Institute of Technology (AKTU), Kanpur, India

**Relevant Coursework:** Database Management Systems, Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering

### CERTIFICATIONS & TRAINING

#### SAP Certified Associate – Backend Developer – ABAP Cloud, SAP Planned

#### Learning Basic ABAP Programming (S4D400), SAP Learning In Progress

**SAP Learning Hub, Student Edition** (in progress): Basic ABAP Programming, Core ABAP, ABAP Cloud, CDS, RAP, OData, Fiori Elements, SAP BTP, Clean Core
